

Name: - Julekha Bagwan TE COMP Roll No: - 3243

Subject: - LP-II (Cloud Computing)

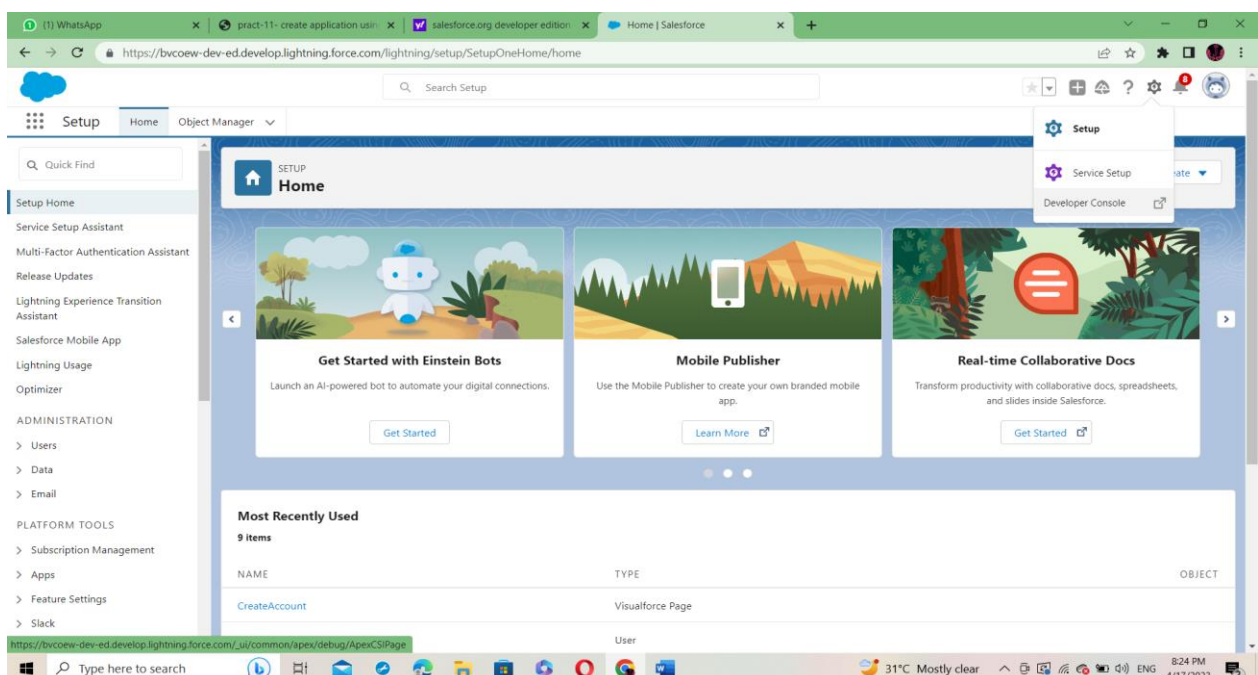

PRACTICAL ASSIGNMENT NO: - 03

3. Title: - Creating an Application in Salesforce.com using Apex Programming Language.

Step 1: - Go to Salesforce.org Developer Edition and Log in to your Account.

Step 2: - After Logging In to your salesforce account go to Developer Console.

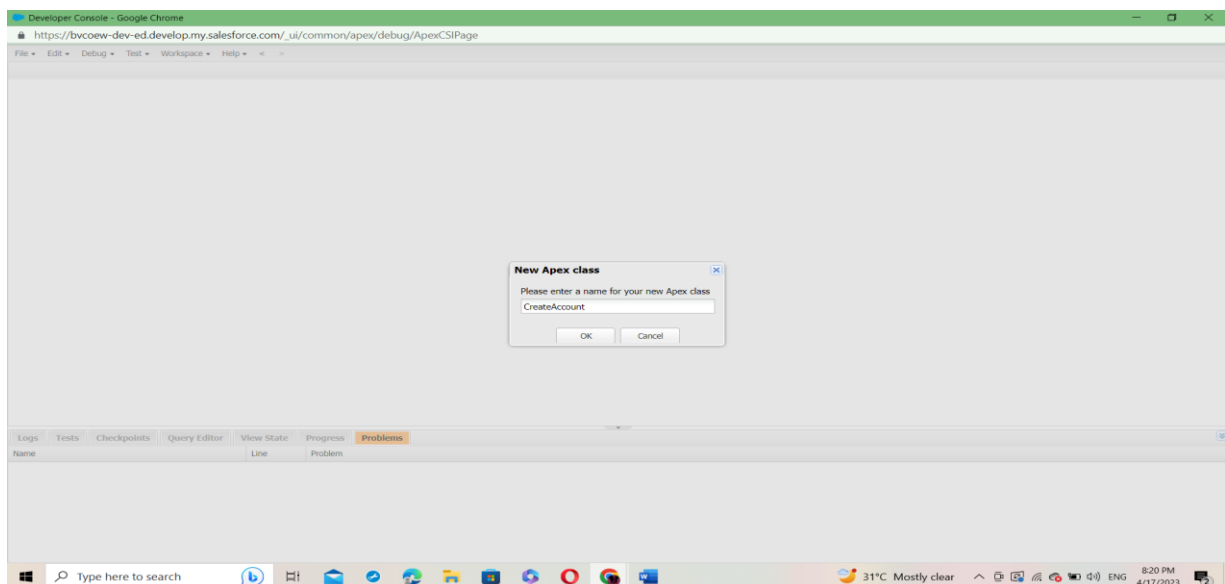

Step 3: - After selecting Developer Console a new tab will open in your browser consisting of Developer Console where we will create our application.

Step 4: - Go to File -> New -> Apex Class to create an Apex Class.

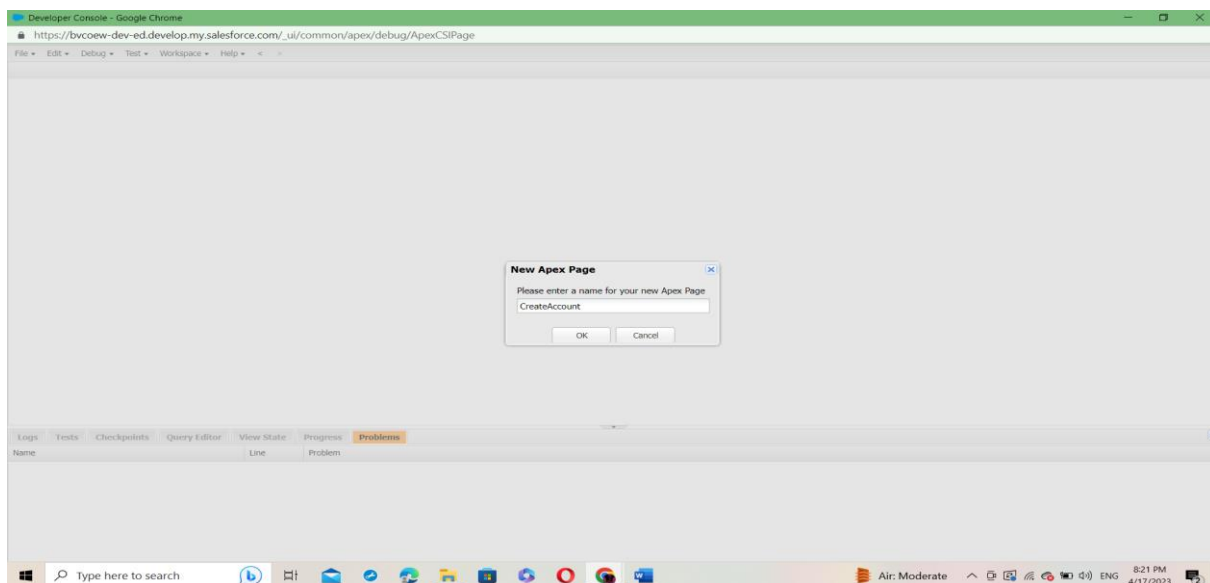

Step 5: -Enter the Name of your Apex class. Here in our case, it is **CreateAccount**.

Step 6: - Go to File -> New -> VisualForce Page to create a Page.

Step 7: -Enter the Name of your Visual Force Page. Here in our case, it is **CreateAccount**.

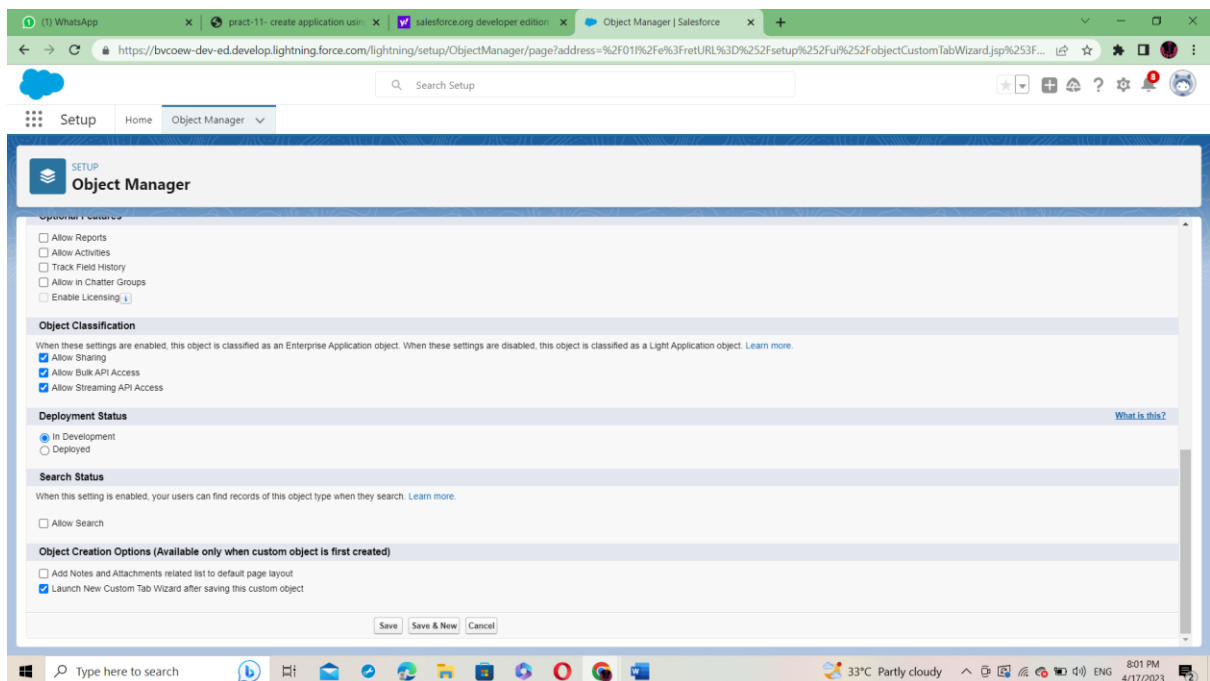

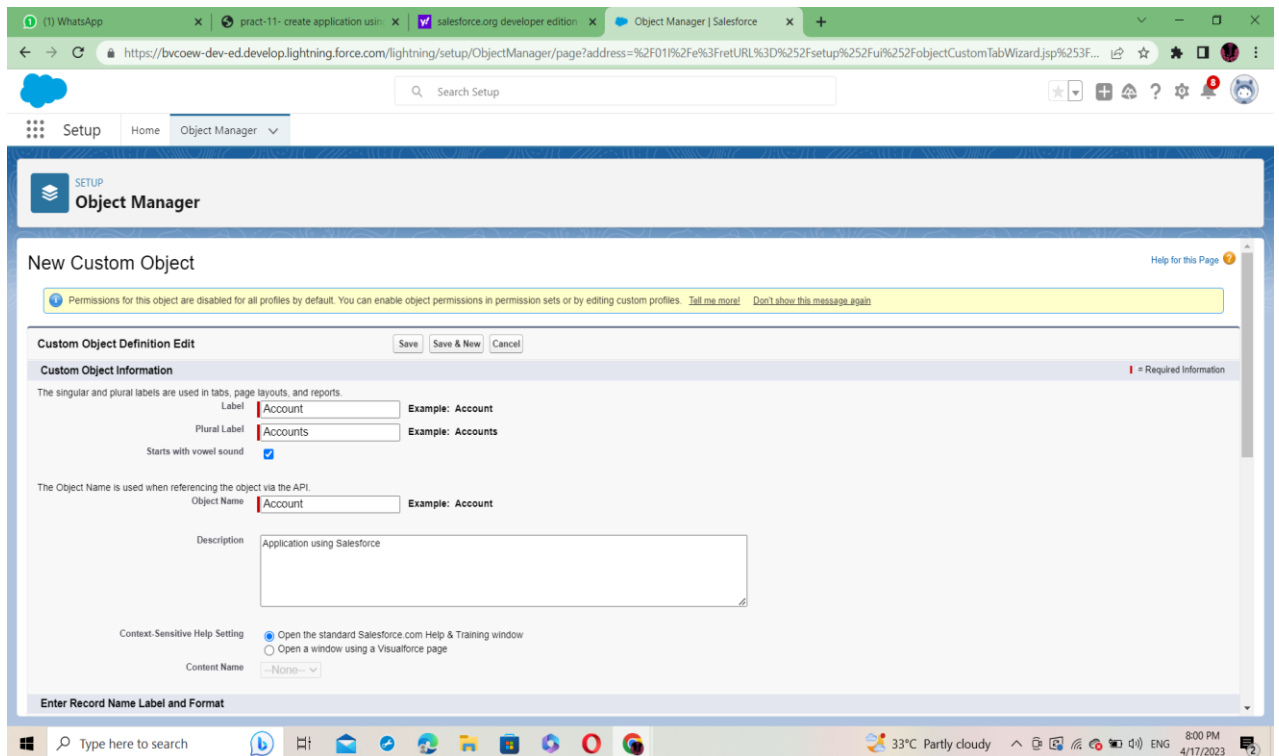

Step 8: - Now go to Home and select the **Create** dropdown

Step 9: - Select the **Custom Tabs** option.

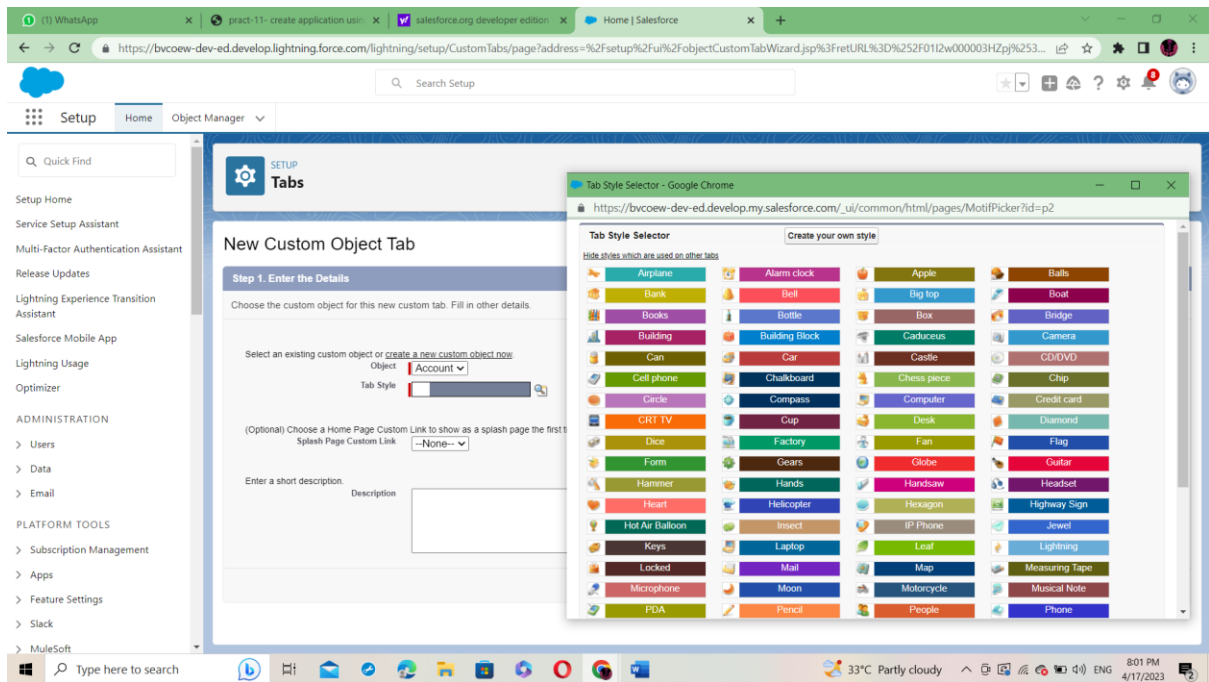

Step 10: - It will ask you to create a new Custom object. Go to that link and **New Custom Object** screen will appear

Step 11: - Fill in the fields and go on clicking Next option. Keep the option on the page 2 & 3 as it is and select **Save** Button

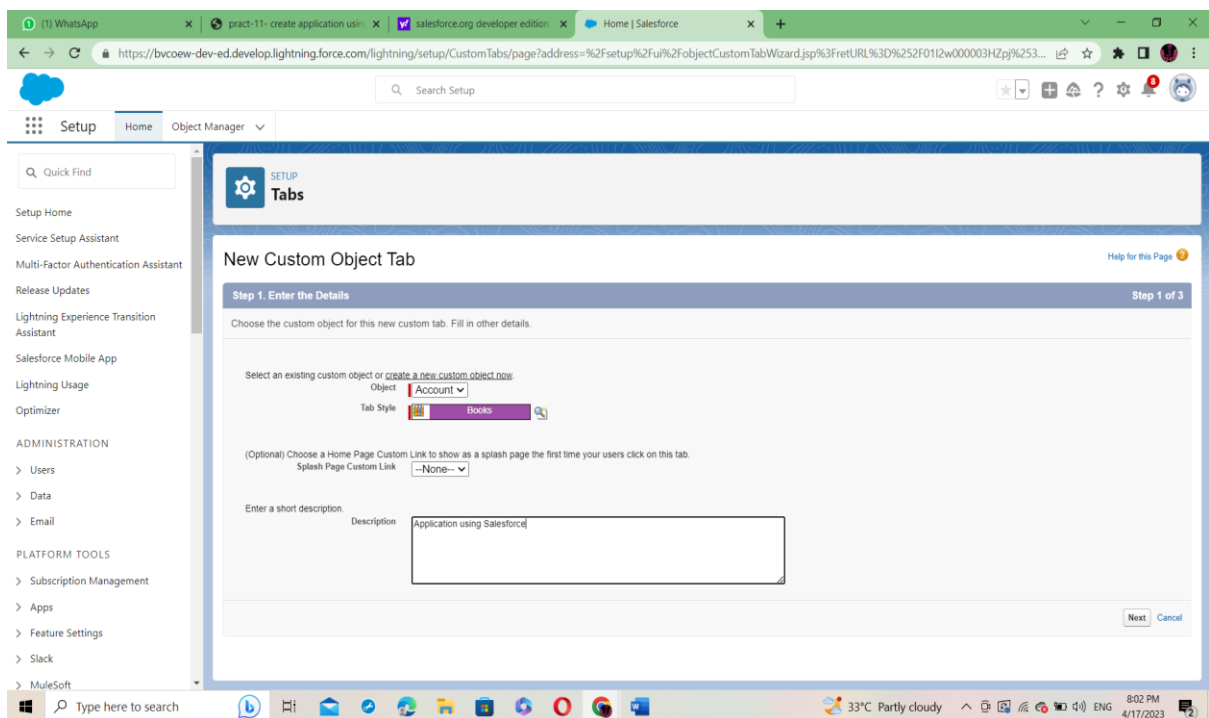

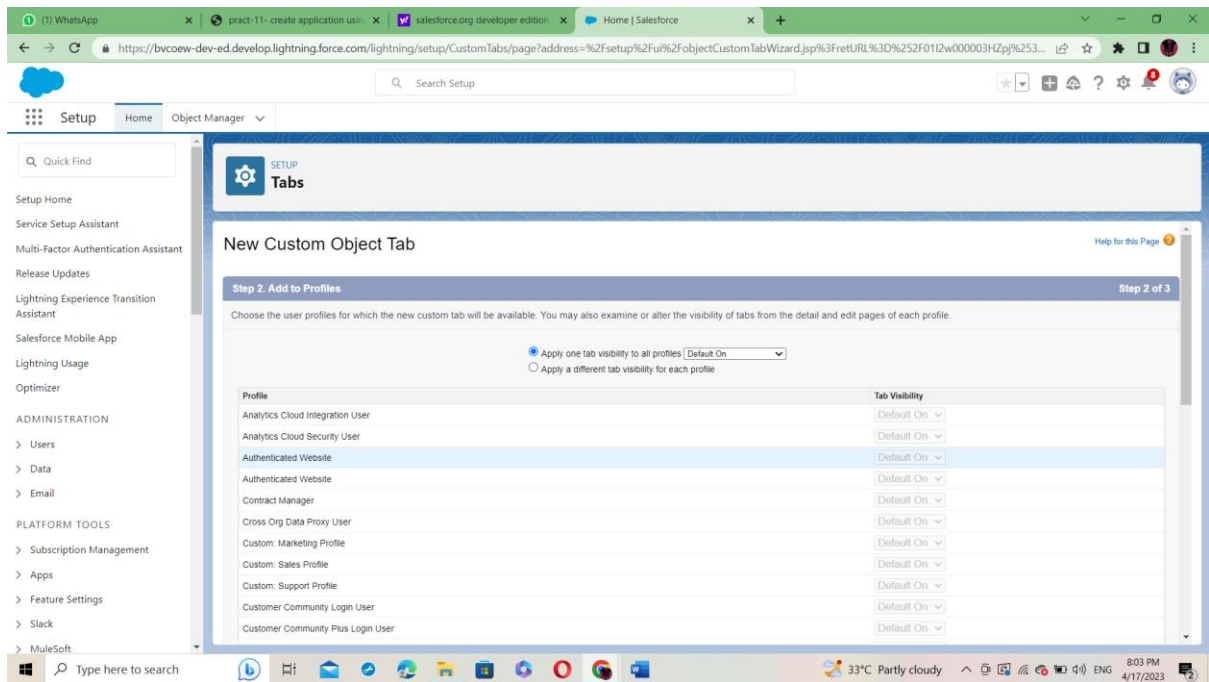

Step 12: - After creating the Custom Object return to the **New Custom Object** Tab.

Step 13: - Write the name of the Object, Choose the Tab Style and write some description about it.

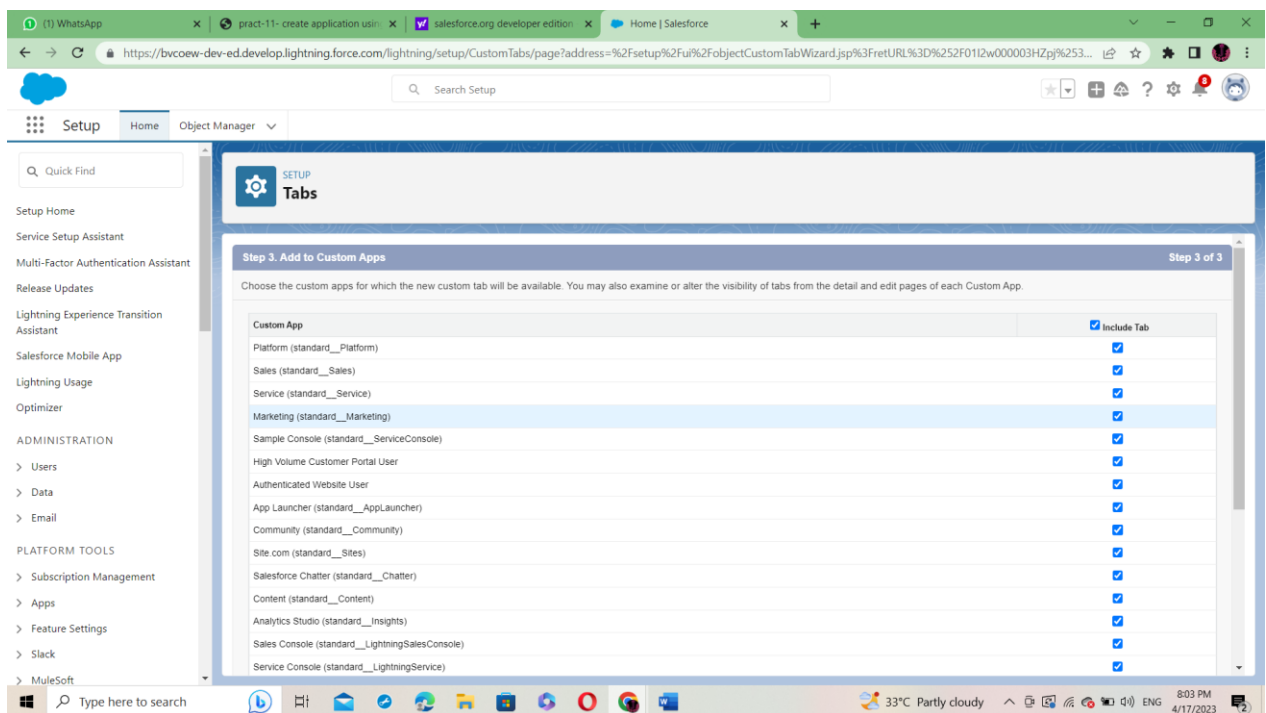

Step 14: - Click on Next.

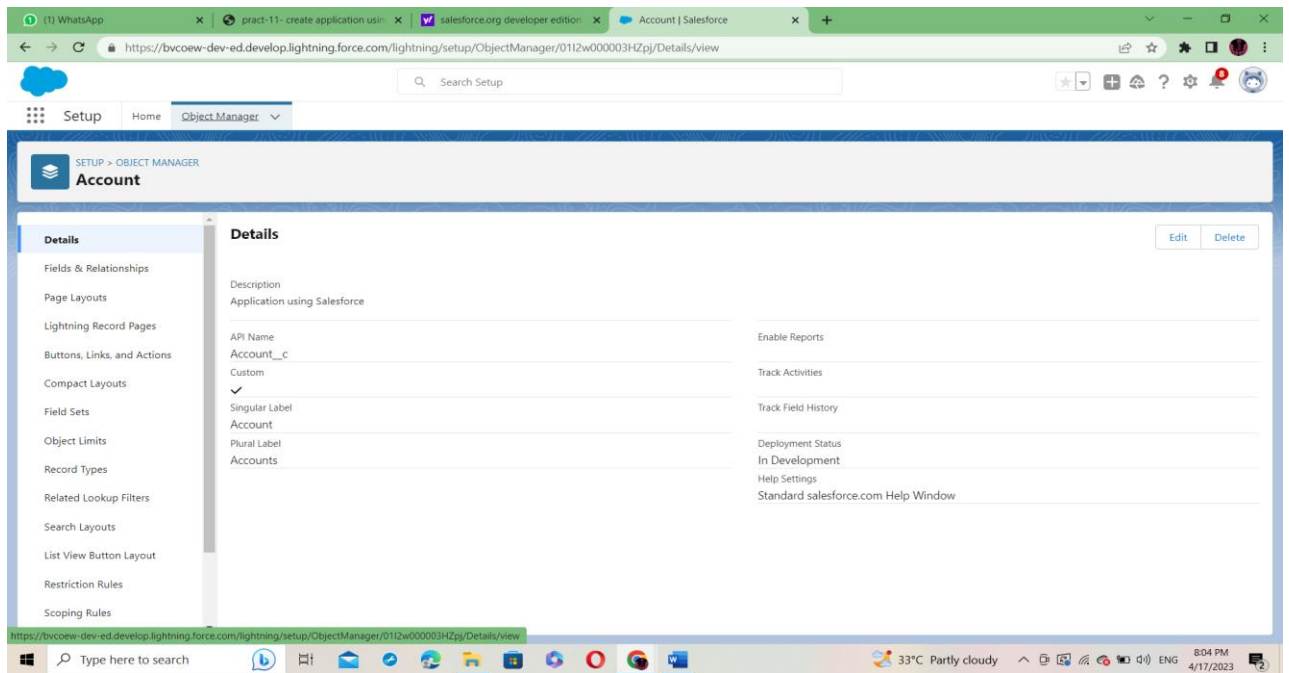

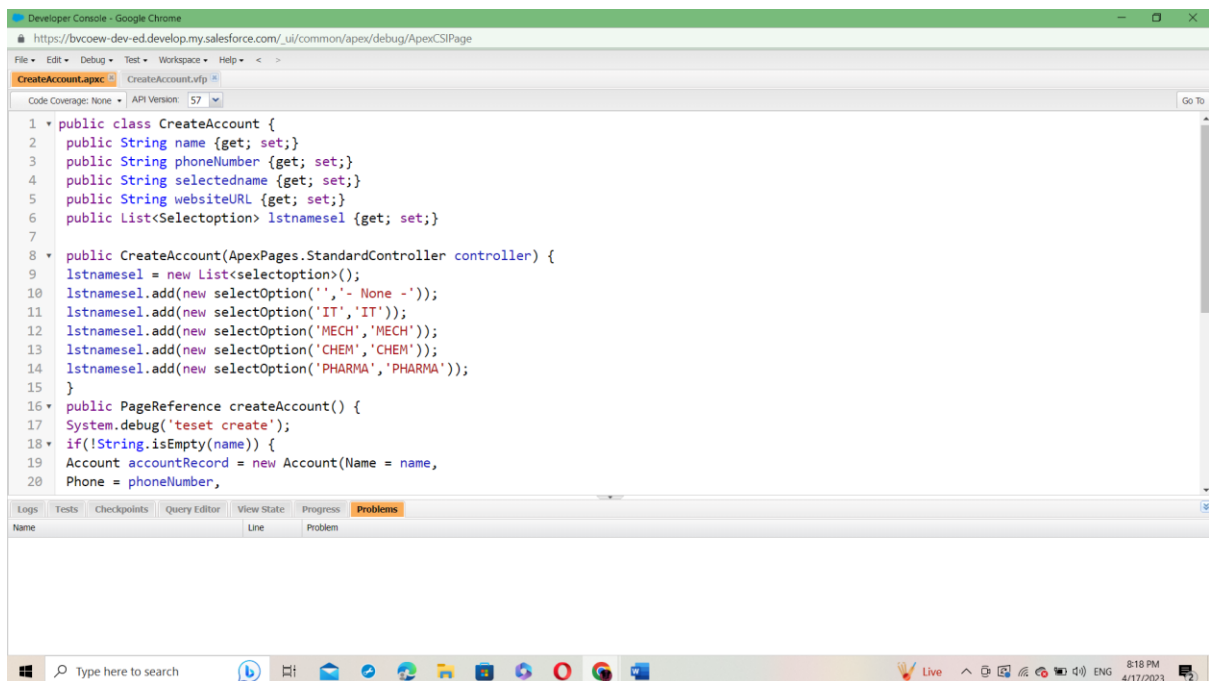

Step 15: -Go on selecting Next option.

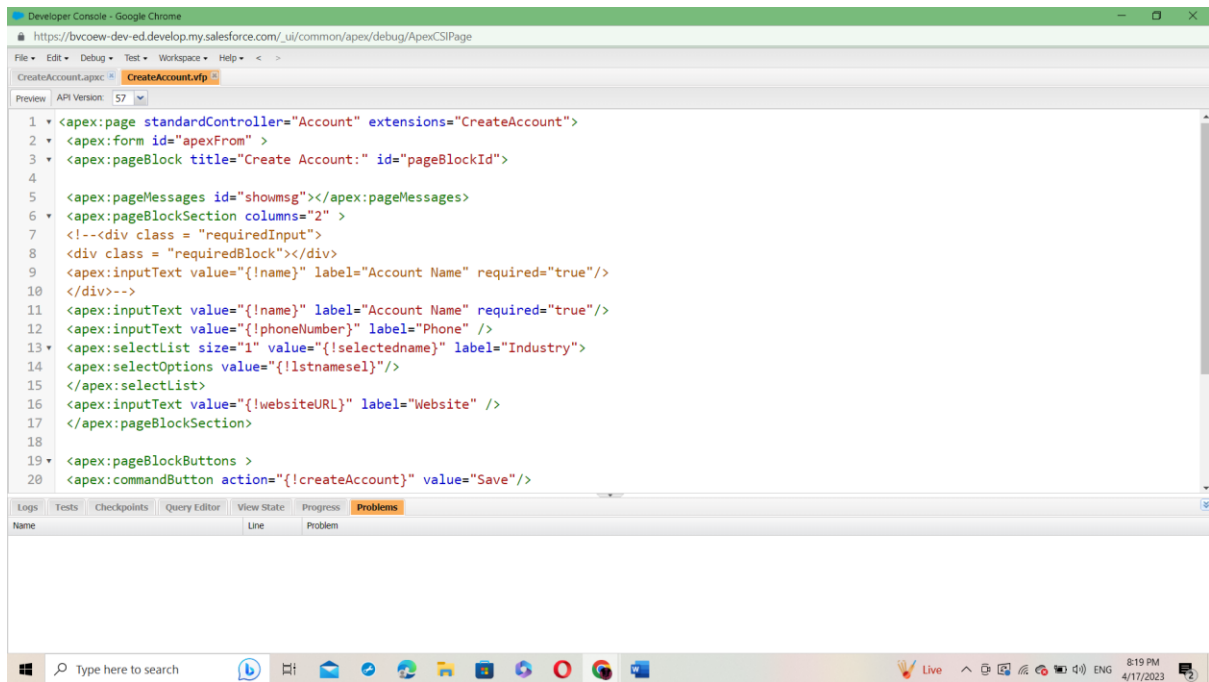

Step 16: - The object will be created and it will be displayed in Home Page When you will click on that Detailed Object description will appear.

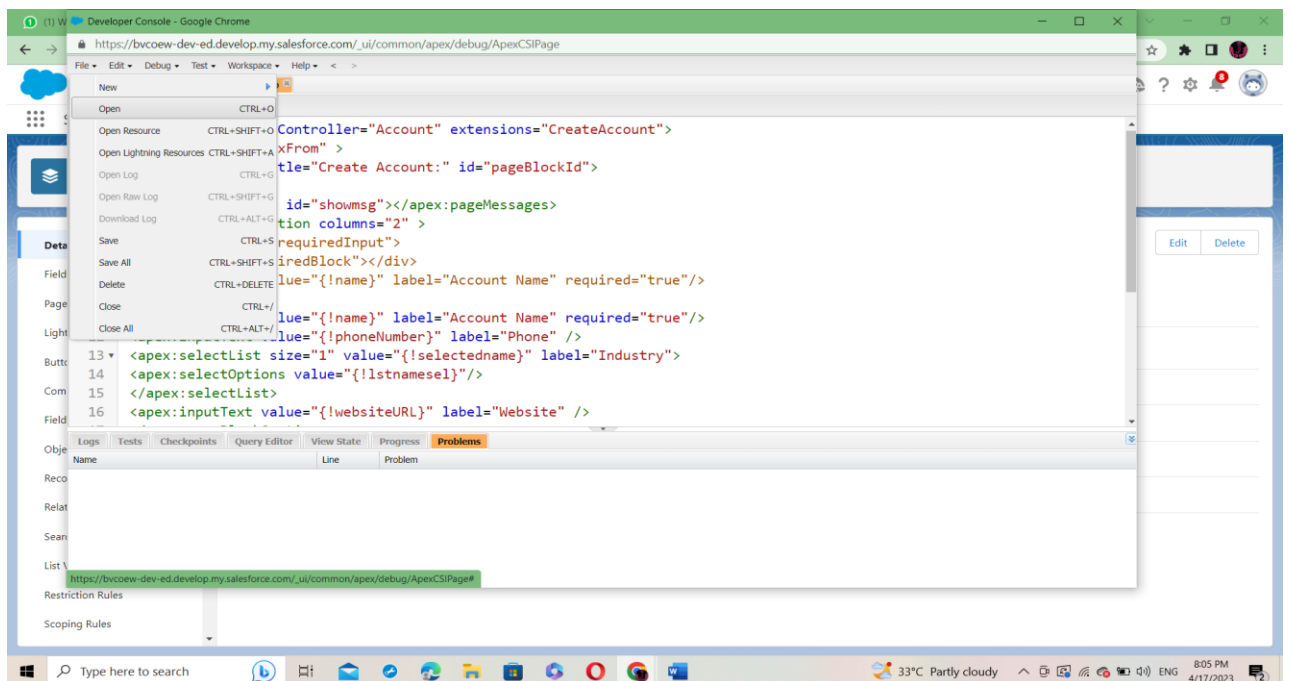

Step 17: - Go to Developer Console and write your code in CreateAccount.apxc and CreateAccount.vfp

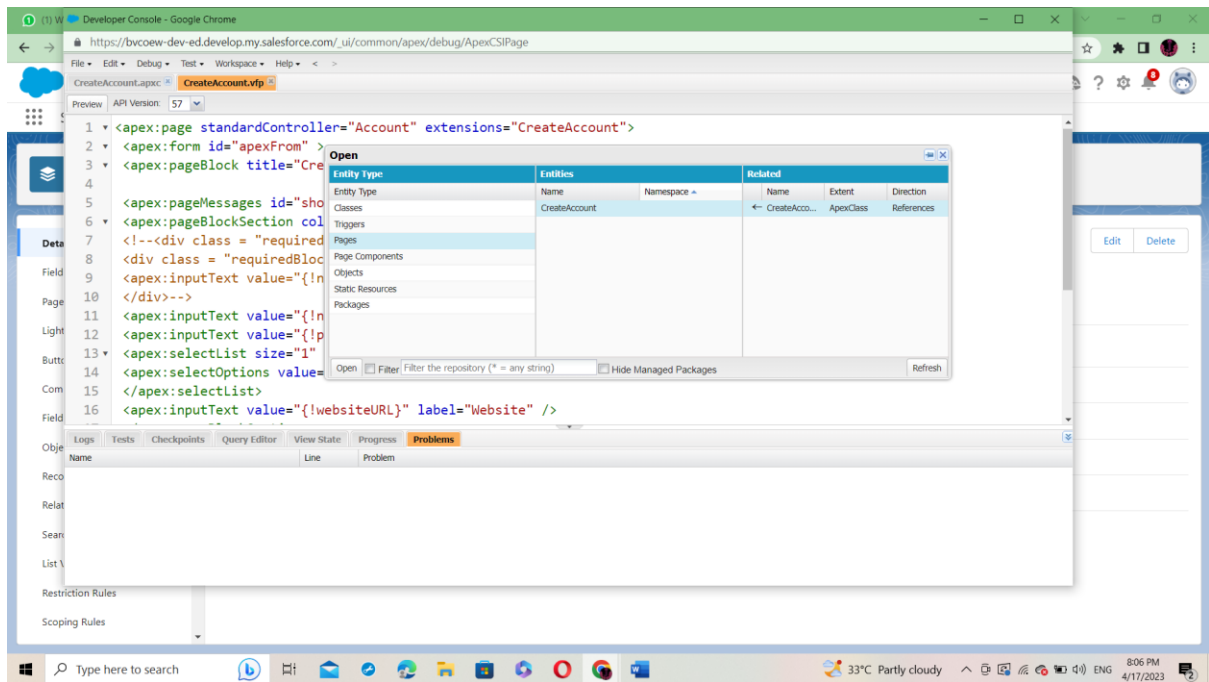

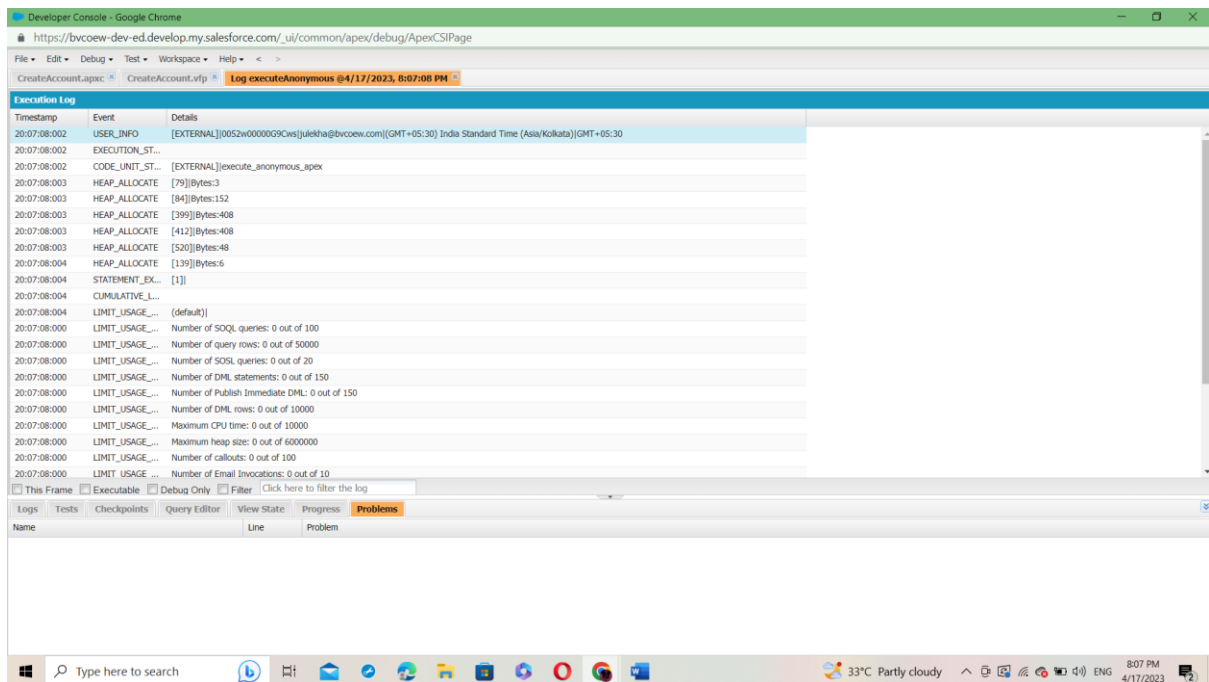

Step 18: - Go to File -> Open -> Pages

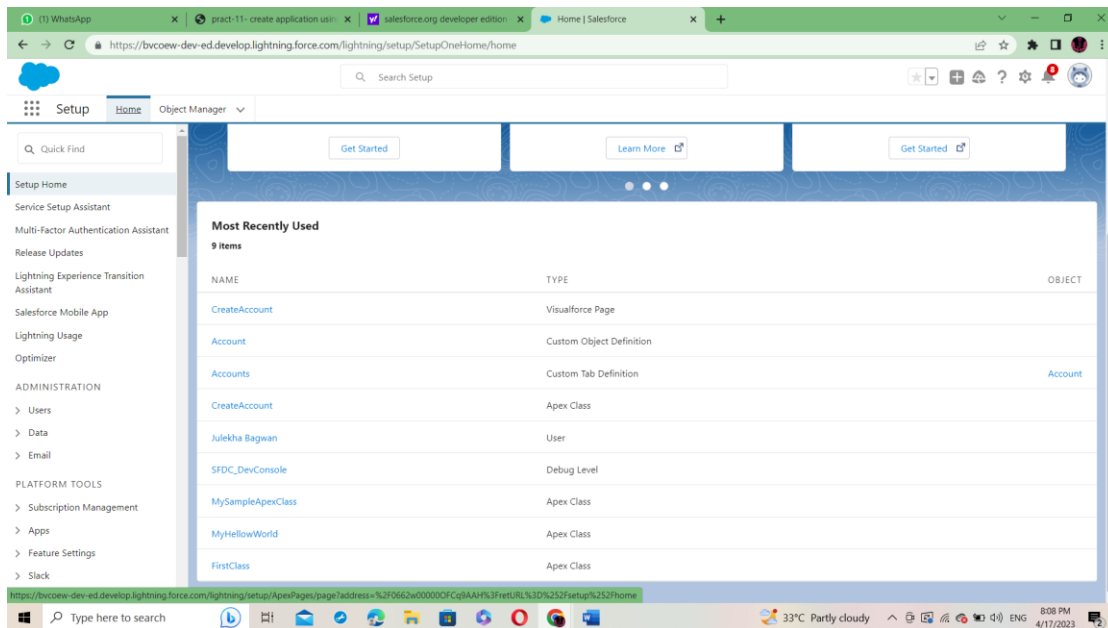

Step 19: - Select CreateAccount from the page section.

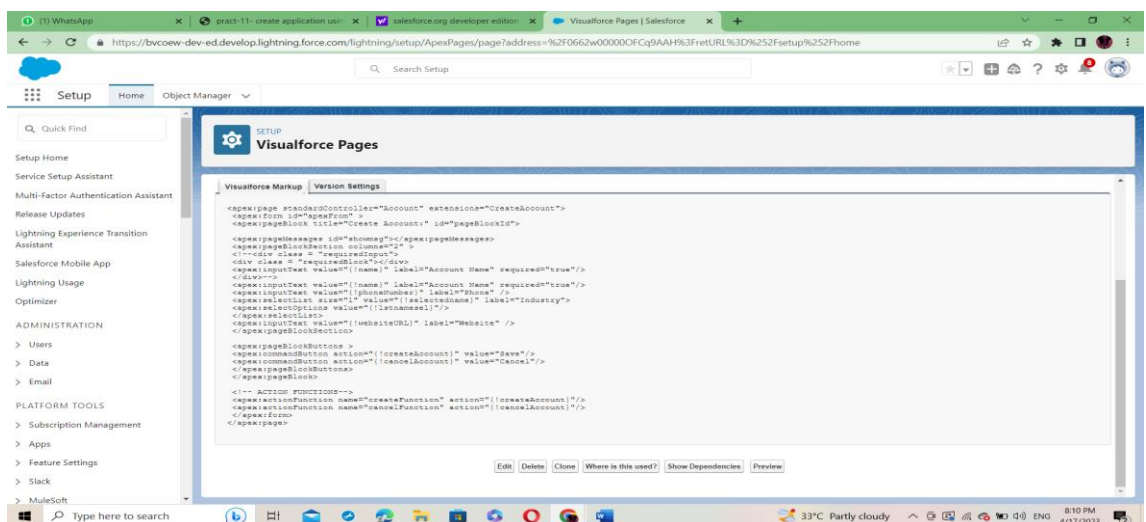

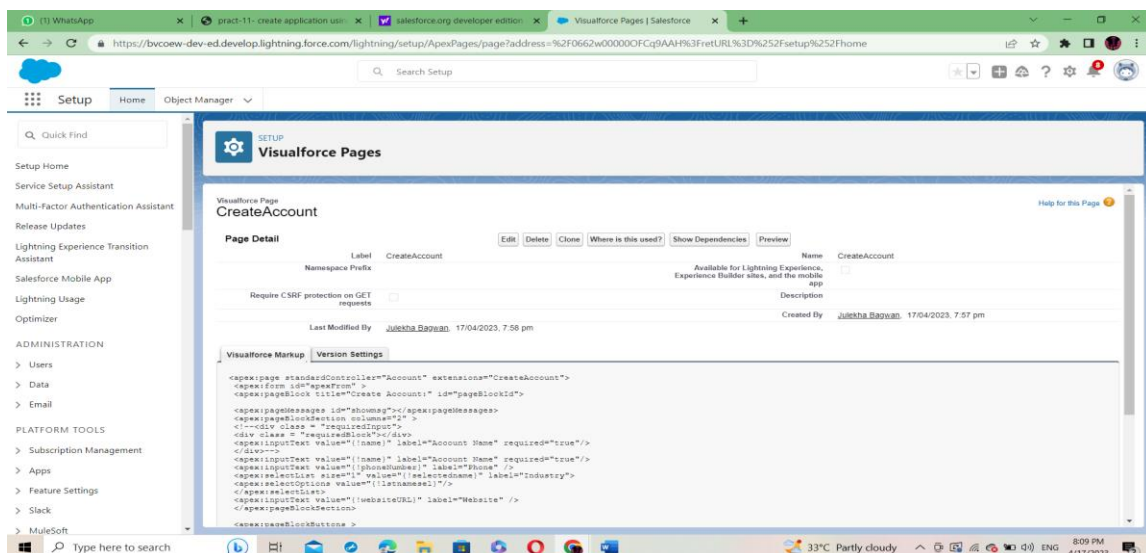

Step 20: - Go to Debug -> Execute Anonymous Window. A window will open and copy paste the CreateAccount.apxc code into it. And select Execute. Check the checkbox.

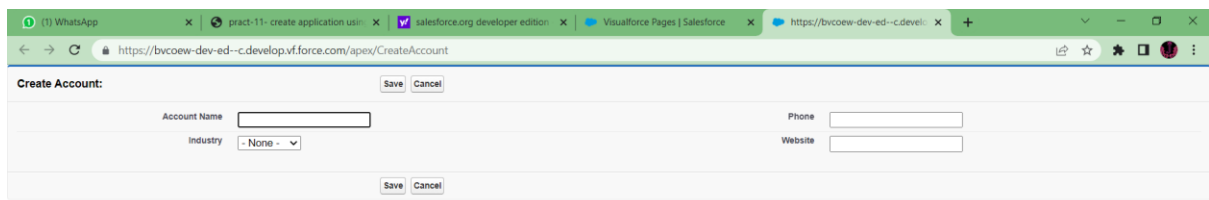

Step 21: - Come back to Home Page Go to CreateAccount Visual Page.

Step 22: -Select Preview Option.

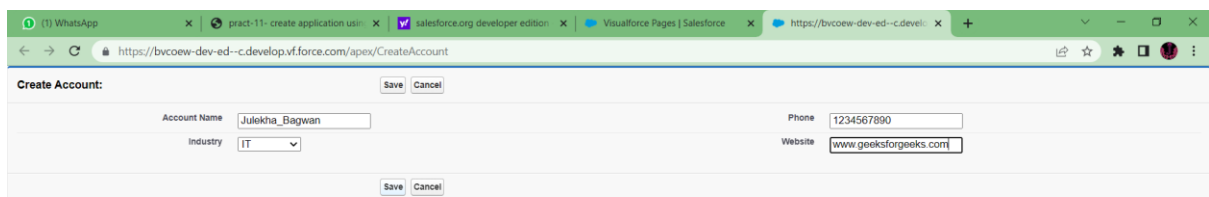

Step 23: - A screen of executing application will appear.

The screenshot shows a web browser window with multiple tabs. The active tab is titled 'https://bvcoew-dev-ed--c.develop.vf.force.com/apex/CreateAccount'. The page displays a 'Create Account' form with the following fields: 'Account Name' (text input), 'Industry' (dropdown menu showing '- None -'), 'Phone' (text input), and 'Website' (text input). There are 'Save' and 'Cancel' buttons at the top right and bottom center of the form.

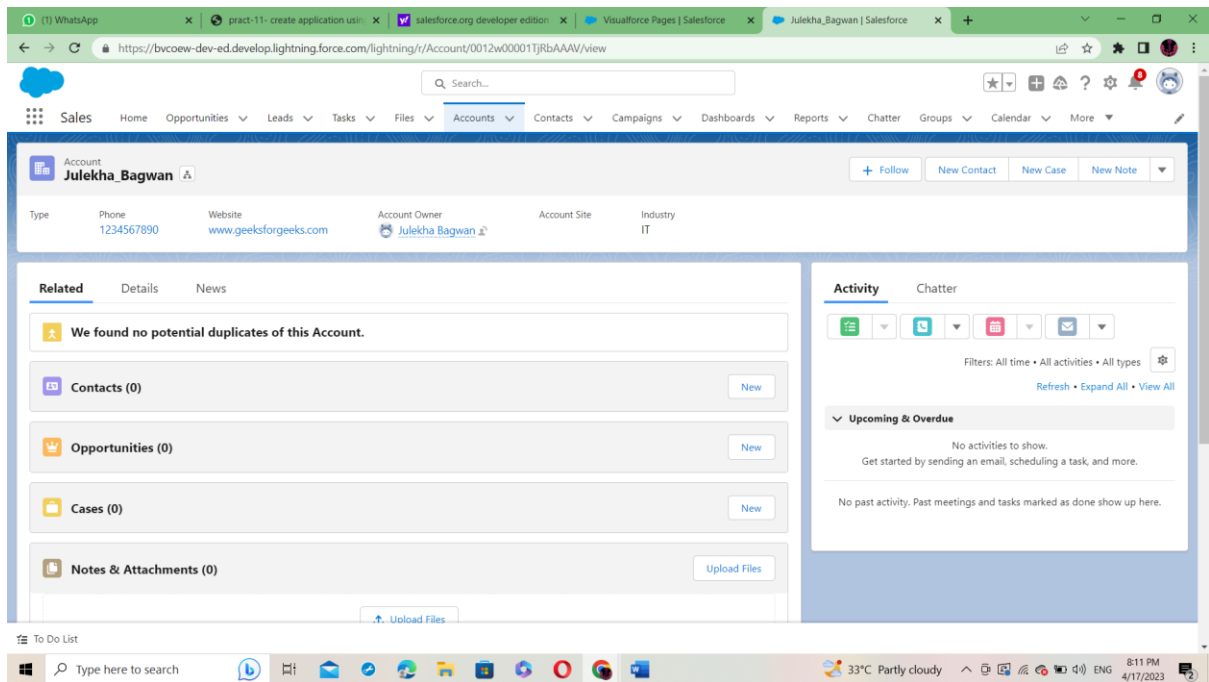

Step 22: - Enter the details in the field and click on **Save** button.

This screenshot shows the same 'Create Account' form as the previous one, but with data entered into the fields. The 'Account Name' field contains 'Julekha_Bagwan', the 'Industry' dropdown is set to 'IT', the 'Phone' field contains '1234567890', and the 'Website' field contains 'www.geeksforgeeks.com'. The 'Save' and 'Cancel' buttons remain visible.

Step 23: -Finally the output screen will appear like this.

Step 24: - Here different users are creating by using same object and there is only one Account Holder.
